

1. Explain why do we want sometimes to use `setImmediate` instead of using `setTimeout`.

Solution:

`setImmediate` do not delay the time of execution while the `setTimeout` delays the execution of the function by the timer we have passed to it. So we use `setImmediate` if we do want a delay.

2. Explain the difference between `process.nextTick` and `setImmediate`?

Solution:

`process.nextTick` is executed before `setImmediate`.

3. Name 10 global modules/methods available in Node environment.

Solution:

1. “http”
2. “url”
3. “debug”
4. “Async”
5. “Bower”
6. “Browserify”
7. “Csv”
8. “Express”
9. “Forever”
10. “Grunt”;
